

Small Coreless DC Motors

CL Series 3 to 25 W Coreless DC Motors

Smooth-running, optimized-performance coreless DC motors

Allied Motion's CL series of small coreless DC motors provides maximized performance through the use of high performance permanent magnets, a uniquely wound and formed coreless rotor, and in the CL29 and CL40 a precious-metal commutation system. CL motors are efficient, having zero iron loss, and being coreless, they have no preferred rotor position (cog-free), minimal torque ripple, and low rotor inertia.

Available in three diameters (29, 40, and 66 mm), CL series motors are ideal for medical devices, small pumps, mirror/prism drives, and ticket and money dispensers.

Features & Benefits

- Coreless rotor design for smooth, cog-free operation
- High-strength magnets for maximized performance

- Coreless design means no iron loss and higher efficiency compared to iron-core motors
- Precious metal commutation system in CL29 and CL40 models for low starting voltage
- Low inertia rotor for rapid response

Options

- Spur or planetary gearhead with ratios up to 900:1
- Incremental or absolute encoder
- Integrated tachometer
- Ball bearings for CL29 and CL40 models
- Custom winding for alternate voltages
- Custom lead and connector configurations
- Alternate shaft configurations

- High performance DC coreless motors in 29, 40, and 66 mm diameters
- Power ratings from 3 to 25 W and voltage ratings from 6 to 36 VDC
- Optimized performance from coreless winding and high strength magnets
